

FTC Construction Crew

What is my role?

Build a functioning robot according to the ideas of team members. Document the design and construction process throughout the season.

What are my responsibilities?

- Operate all tools and equipment safely and carefully.
- Record, draw, and note the design and construction process for the engineering notebook. You will need to take notes on what decisions are made and why.
- Research robot parts and notify coaches if a part needs to be purchased.
- Make sure that the team's robot is brought to competitions and back home again.
- Make sure that all tools necessary for the operation of the robot are brought to tournaments.
- Charges the robot batteries before team practices and tournaments.
- Be familiar with the rules on what can/cannot be used in the construction of the robot.
